### NOTE TO CUSTOMER:

Hello Cynthia, Thank you for taking the time to show me around the church today. To wire up the Church property we'll want to install 3 Wireless Access Points in the Sanctuary, two in the back, one in the front. We'll also want to install 3 hardwired ports in the same locations. We'll also pull cables to the back offices and upstairs for wifi access points. When you compare your quotes, know that you'll get what you pay for. I've been doing networking for 17 years so we have a special mastery that only experience creates. I also make it a personal commitment to do whatever is necessary to bring the best technology to my clients so they can relax knowing they are getting the best for themselves and their clients. We can start this install as soon as March 7th. Let me know! -Matt, CLEAR Technology

### THIS IS AN ESTIMATE

Equipment pricing is locked for 14 days from receipt of this estimate. After 14 days, if not approved, equipment pricing may change. We've done our best to estimate the labor needed to complete the job, however unforeseen circumstances may require a change in scope. We'll alert you to any changes as soon as necessary.
